Visit the Templar Route of the Médio Tejo!

Walk the Templar Route and its thematic itineraries: Military, Architectural, Religious and Symbolic. Create and customize the route you want to take. The options are diverse!

In the Capital of the Templars, Tomar, explore the Convent of Christ, the Sete Montes National Park and the S. Maria do Olival Church. In Ourém, visit the Medieval Village and its Castle.

In Dornes, take in breath-taking landscapes, the backdrop of its magical Pentagonal Tower. In Sertã, get to know the Castle and the legend of Celinda, fighting against the invaders.

And in Abrantes visit the Fortress, made by King Afonso Henriques, who called himself "brother" of the Knights Templar. Already in Torres Novas, visit its imposing Castle. In Vila Nova da Barquinha you will find the Almourol Templar Interpretation Centre and the magnificent Almourol Castle, embraced by the Tagus river.

And in this world of discovery... there are several curiosities: did you know that the Templars were the first "bankers" of the World, who brought innovations to military architecture, such as the Alambor or the Keep in Tomar, or that, because it was the date of its extinction we are still afraid of Friday the 13th? And there are even legends that say that in one of these places is today the Holy Grail! For this, and much more, come and discover the templar lands of the Médio Tejo!
